- ▶ File System
- ▶ LP (Line Printer)
- ▶ Named Pipes

Delivery

- ▶ **Print Servers**
- ▶ Printer Licensing
- ▶ Email
- ▶ Application
- ▶ Delivery Monitor

Troubleshooting

- ▶ Login Credentials

Print Servers

This option allows the addition of print server(s) available for delivering documents from FTSpooler. Printers installed on selected server(s) are listed. Individual printers may be licensed using **Printer licensing** from the Delivery menu at screen left. Local printers are ALWAYS shown.

More information on Printer Licensing

To add a print server:

- Enter the **Server name** and click the **Add to the list** button. The list of **Print servers used to deliver documents** is updated.

To remove a printer server:

- Select one of the print servers and click the **Remove from the list** button.
- Confirmation dialog box pops up.
- Click **Yes** to finish.
