Project Files

To edit a Project:

- Choose **Settings** from the **Project** menu or click the **Project Properties tool** button on the project toolbar. The **Project** dialog box opens.

Title	Full Path
Envelope	C:\Program Files\TCGIS\FTDesign\Forms\Env...
Statement	C:\Program Files\TCGIS\FTDesign\Forms\Sta...

- On the **Project** tab:
 - Modify the name of the load (.asc) file in the **Output** box.
 - Modify the location of the load (.asc) file in the **Output location** box.
 - Click the **Add** button to add a form to the project. Alternatively, choose **Add files** from the **Project** menu, or click the **Add files to project tool** button on the project toolbar.
 - Select an unwanted form and click the **Remove** button to delete the form from the project. Alternatively, click the **Remove files tool** button on the project toolbar to delete highlighted form(s).

To add a new form to the project:

- Select **New form** from the **Project** menu.
- Choose the **Extract mode** and click **OK**.
- On the **Save As** dialog box, give the new form a name and click the **Save** button.
- The new form is now part of the project.
