Overview

In Records mode, the data sent to FormTrap is specially formatted. The first column of each line identifies the **page element** and indicates to FormTrap which part of the form it should print. The rest of the line is comprised of fields that have a fixed start position and a fixed length. The figure below shows a sample records mode data file.

Identifier	Company Name				
FT123	FormTrap Pty. Ltd.	Level 3		53	Balfour St
D12062002	Invoice 10081977	30062002	9368.30	9368.30	
D12062002	Invoice 10081977	30062002	9368.30	9368.30	
D12062002	Invoice 10081977	30062002	9368.30	9368.30	
5	657921.89	-75.00	-1.00	657846.89	-2.00 Past Due
