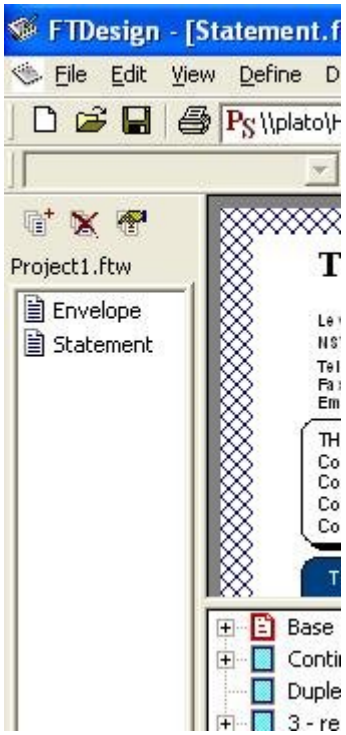
Overview

PDF version

A project is a file that carries a form or a group of forms and other indicated files (fonts, graphics) and settings. FormTrap load (.asc) files are created from the contents of a project.

- The project window appears on the left side of the FTDesign window.
- The project name appears at the top of the project window beneath the project toolbar.
- Files in the project are listed.



You can perform the following functions using the project toolbar.

Tool	Description

	Add files to project tool - add form(s) to the project
	Remove files tool - remove a form from the project
	Project Properties tool - edit the properties of the project
