## Overview

In Records mode, the data sent to FormTrap is specially formatted. The first column of each line identifies the [page element](#) and indicates to FormTrap which part of the form it should print. The rest of the line is comprised of fields that have a fixed start position and a fixed length. The figure below shows a sample records mode data file.

Identifier	Company Name					
012062002Invoice	10081977	30062002	9368.30	9368.30		
012062002Invoice	10081977	30062002	9368.30	9368.30		
012062002Invoice	10081977	30062002	9368.30	9368.30		
5	657921.89	-75.00	-1.00	657846.89	-2.00	Past Due

Labels below the table: Identifier, Company Name, Customer Code, Address Line 1, Address Line 2
