New Entry - Header Area

The header area holds text that outputs at the top of your repaginated data file and should include all of the header information, down to and including any title lines. You may have a raw data file that contains two purchase orders, each purchase order spanning multiple pages. The output of the repagination process must contain two headers, one for each purchase order.

To insert a new header area and hence a new entry:

• Select New Entry - Header area from the Insert menu or click the Insert document

header tool 🛄 button on the toolbar.

• Highlight the area in the Mapping window that represents your document header and

release the mouse button. The header area is displayed in red and your entry and header listed in the Areas window.
