Tools - Test

When you have finished creating your entries, areas and rules, you can then test your repagination rules with the sampl you have opened. You can also save the repaginated output and return to FTDesign to continue designing your form witl repaginated output.

To test your rules and save the output from your test:

- Select Test from the Tools menu.
- The Repagination done window will be displayed containing the output from the repagination process accordinç rules you have created. You should see your sample data has been reformatted, where:
  - Header appears at the top and only once for each document.
  - Footer appears directly under the header and only once for each document.
  - Data areas are printed continuously without header or footer information separating them. You should e required data areas appear in the output.
- Click Save to save the output from the repagination process to a location on your system.
- Click Close to close the Repagination done window and return to the FormTrap Repaginator.
