

Special Features

[Masking](#)

[Replacing Fonts](#)

Special Features

FormTrap uses a number of special features that give you extra control over the appearance of the final document.

- [Masking](#) gives you extensive control over the formatting of output text, particularly for dates and currency.
- [Replace fonts](#) provides a function to replace fonts in your form. It is a convenient way of making global changes to fonts used in the form.

This section explains the two features in more depth.
