Creating Page Elements - Page Header and Footer

The Page header is typically smaller in size than the Report header. It is used to create extra space for details on all pages subsequent to the first page, as these pages typically do not require the same level of detail as covered by the Report header. For instance, a Page header would typically only carry basic customer and document information as well as the page number.

Page Header →

Ord.	Qty	B.O.	MT	Part Number	Description	Unit Price	Amount
2	2	LY		850130	Brought forward from Page 1	21.12	\$2,738.24
				BEARING INSERT 1.00			\$42.24

To create the Page header:

- Select **Page header** from the **Define** menu.
- On the **Settings** tab set:
 - **Height** - height for the Page header.
- On the **Accumulative fields** tab, create a new accumulative field if not already defined.

Page header

Page Footer

The Page footer is typically smaller in size than the Report footer. It is used to create extra space for details on all pages previous to the last page, as these pages typically do not require the same level of detail, if any, as covered by the Report footer.

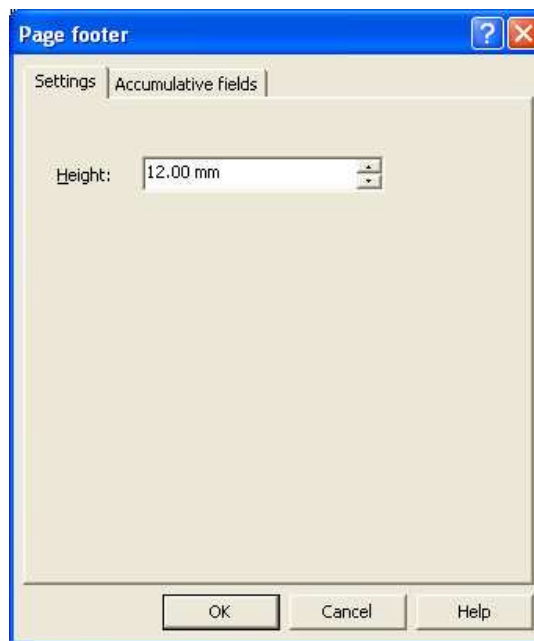

Page Footer →

2	2	LY	810070	BUSHING 2.00 IDX2.5	23.40	\$46.80
Carried forward to Page 2						\$2,438.34

To create the Page footer:

o **height** - height for the Page footer.

- On the **Accumulative fields** tab, create a new accumulative field if not already defined.
