### FormTrap Repaginator

- ▶ Overview
- ▶ Loading a Sample Data File
- ▶ Entry
- ▶ Tools
  - ▶ Options
  - ▶ **Test**
  - ▶ Font
- ▶ Running Repaginator from Command Line

#### Tools - Test

When you have finished creating your entries, areas and rules, you can then test your repagination rules with the sample data file. You can return to FTDesign to continue designing your form with that repaginated output, or if the output is useful, can save the repaginated data file.

To test your rules and save the output from your test:

- Select **Test** from the **Tools** menu.
- The **Repagination done** window will be displayed containing the output from the repagination process according to the rules you have created. You will see your sample data has been reformatted, where:
  - **Header** appears at the top and only once for each document.
  - **Footer** appears directly under the header and only once for each document.
  - **Data areas** are printed continuously without header or footer information separating them. Ensure ALL required data areas appear in the output, and NO superfluous lines appear.
- Click **Save** to save the output from the repagination process to a location on your system.
- Click **Close** to close the Repagination done window and return to the FormTrap Repaginator.

The screenshot shows the 'Repagination done' window with two panes. The left pane displays a formatted invoice for 'SKIPPY INVESTMENT & WIDGET SAL' with a table of invoice items. The right pane displays a 'STATEMENT' for 'SKIPPY NUCLEAR FUSION & MATCH COMPANY' with a summary table of payments and invoices.

Invoice No.	Inv. Date	Tr
960257	02-Sep-01	In
